Connected business
Guest Wi-Fi

Guest Wi-Fi provides reliable and fast Wi-Fi to your customers, creating a significant value-added service to your business for connecting your guests. Customise your own branded landing page for guests visiting your establishment, and control business rules according to your requirements.

Guest Wi-Fi is the perfect solution for hotels, retail stores, shopping centres, restaurants and coffee shops, all the way through to schools and universities.

Benefits:

Connecting your guests means more than just connecting their devices to your network. Powerful analytics lets you understand demographics and behaviour of your customers.

- **Customer experience and loyalty** is everything, and connectivity is key in attracting customers to your business
- **Gain business insights** through analysing demographic and behavioural insights via analytics with flexible reporting, allowing all data collected by the system to be exported and integrated with data from other customer tracking systems or imported into your ERP system
- **Customised to your business**, Liquid Intelligent Technologies's implementation team, alongside your design team, will design a customised look and feel and user journey flow for your brand
- **Own your data** as this is a white-label service, therefore all personal data originating from your customers is completely confidential
- **Integrate seamlessly** with third party systems or services, like the delivery of third party advertising on your fully customised landing page
- **Reduce cost and risk** with affordable equipment rates and no upfront lump sum installation costs, including hardware replacement services for faulty access points that are repaired at no additional cost

Features:

- Captive portal for Software as a Service (SaaS)
- Customer Premise Equipment options include a wide range of deployments from lounges to stadiums
- Deployments guarantee Quality of Service and optimum connectivity in a wide range of conditions

Support

With Access points monitored 24/7 for performance and service status, Liquid Intelligent Technologies's SLA incorporates up to two onsite call outs per month per location on a need be basis, to ensure you are always connected.
